Disk Size Manager is an intuitive and approachable program that analyzes disk space to help you figure out the largest files taking up on the most space. It shows results in pie charts and lets you perform advanced file scans. Simple setup and clear-cut interface After a brief and uneventful setup procedure that shouldn't impose any difficulties, you are welcomed by a user-friendly interface that displays all local disks at startup, letting you find out their total and free space, drive type, file system cluster size, and status. You can select one or more partitions and ask the utility to immediately scan them. It calculates the size of all files and displays the folders in hierarchical view in real time, starting with the largest one. Scan drives, investigate results, and export data These results are automatically translated into the pie chart, so you can quickly find out which containing files of a selected folder are the largest (names and percentage of directory occupied space). The pie chart can be shown in 2D or 3D, with or without a user-defined background color. It's possible to zoom in and out of the graphical representation, copy the image to the Clipboard, print it, or export it to file (.bmp or.jpg format). Disk Size Manager also lets you export the text report to file (.txt, Excel,.html or.csv format), view the compressed size, usage or unused excess of the folders, sort them by name, examine bar charts instead of pie charts, get a detailed view of the results, restructure the results by file types, discover file age and owners, or map network drives. Run advanced file searches and configure app settings Furthermore, you can conduct an advanced file search operation in one or more drives, apply file masks, take temporary Internet files into account, set text content to match, use regular expressions, indicate a size and date range (creation or modification), narrow down results by file attributes, and create an exclusion list with folders. As far as general options are concerned, it's possible to establish a default scan folder at startup, enable fast scan mode, ask the tool to highlight compressed files and folders, restrict file sizes for the scanner, as well as specify files to include and exclude, along with folders to exclude. Evaluation and conclusion Disk Size Manager worked smoothly in our tests, without causing the operating system to hang, crash or pop up error messages. No issues were detected during scans."You can't tell if it's a guy or girl when they walk like this," said one classmate when I asked if she would be voting for Hillary Clinton at this year's high school election. She didn't go on to state her opposition to Clinton, just showed me that Hillary Clinton is already on shaky ground with young voters. Throughout the 2016 campaign, Donald Trump has made a great effort to woo young voters. He has targeted college kids with promises of big college scholarship programs, has promised to make military service more attractive for young people, has made inroads to talking to students, has campaigned in front of students, and has frequently acknowledged that he is younger than his opponent. His campaign has even rolled out a whole new theme aimed directly at students to talk about the challenges they face and what needs to be done to tackle them. Yet his very campaign strategy has worked to undermine his credibility in the eyes of young voters. Trump has been a nearly perfect target for Bernie Sanders and Democratic Socialists of America. Sanders' and DSA's success in mobilizing young voters has been quite dramatic; while Bernie won the youth vote in Iowa, he actually lost overall to Hillary Clinton in the state because he got crushed among young voters. This young voter has been a vocal critic of what she called the "rigged" Democratic National Convention. I was recently chatting with another student who has been speaking out about the Convention on social media. She told me that she has been in the process of transitioning from a registered Democrat to registered Independent. She cited as reasons Trump's inflammatory rhetoric toward women, toward people of color, as well as his embrace of police brutality, and said that she would never vote for a Republican again.
